PROFESSIONAL SUMMARY

Computer Science undergraduate at BINUS University specializing in Data Engineering, Data Analytics, SQL Querying, and Data Visualization. Skilled in transforming raw transactional and operational datasets into structured schemas, predictive statistical models, and executive dashboards. Seeking a Data Analytics or Data Engineering Internship opportunity to leverage technical problem-solving skills in building robust data pipelines and analytical solutions.

TECHNICAL & SOFT SKILLS

Programming Languages:	Python, SQL, C
Data Engineering & ETL:	Pentaho Data Integration (Spoon), MySQL
Analytics & Visualization:	Tableau, Power BI, Pandas, Scikit-learn
Statistical Analysis:	ANOVA, Chi-Square Test of Independence, Hypothesis Testing
Soft Skills & Tools:	Teamwork, Critical Thinking, Time Management, Leadership, Attention to Detail

PROJECT EXPERIENCE

E-Commerce Sales and Profit Analytics Using Data Engineering Pipeline *| Pentaho Data Integration, Power BI*

- Built an end-to-end ETL pipeline to extract, transform, and load raw e-commerce transaction logs into a star-schema dimensional model for analytics.
- Identified key factors influencing unit sales, net profit margins, and fulfillment bottlenecks across product categories and geographic regions.
- Applied statistical hypothesis testing (ANOVA, Chi-Square) to evaluate relationships between fulfillment channels, discount strategies, and net profitability.

Database System Design & 3NF Normalization for a Digital Payment Platform *| MySQL*

- Modeled and normalized an un-structured (UNF) digital payment dataset into Third Normal Form (3NF) to eliminate insertion, update, and deletion anomalies.
- Designed a relational schema architecture covering `Users`, `Account`, `Transaction`, `Payment Method`, `Payment`, and `Transaction History`.
- Optimized database integrity and query execution for high-volume transactions including Top-Up, Peer-to-Peer Transfer, QRIS, and PayLater services.

Data Analytics in HR Datasets *| Python, Pandas, Scikit-learn, Data Visualization*

- Analyzed employee historical data to isolate key demographic, salary, and operational factors contributing to workforce terminations.
- Evaluated employee retention patterns and identified critical tenure drop-off milestones across organizational cohorts.
- Executed Chi-Square Tests of Independence and ANOVA to mathematically prove relationships between job roles, commute distance, and turnover risk.

Data Visualization in Video Games Sales *| Tableau*

- Developed interactive dashboards visualizing global video game sales across platforms, genres, and regional distribution channels.
- Modeled post-launch sales lifecycle decay, wishlist conversion rates, and player purchasing behavior across physical vs. digital storefronts.
- Executed statistical analysis to measure correlations between review scores, pricing models, and long-tail game revenue.

Face Mask Detector *| Python, Computer Vision*

- Developed a real-time computer vision classification model for automated face mask detection from camera feeds.

Peer2Peer *| Software Development*

- Engineered a peer-to-peer payment platform prototype for seamless direct user-to-user transaction processing.

Shippdeck *| Web Application*

- Built a shipping and logistics management interface module to track supply chain order status and fulfillment.

Pbattle V Monster *| Java, Object-Oriented Programming*

- Programmed a turn-based RPG battle engine applying OOP principles (Inheritance, Encapsulation) for combat logic.

Global Alignment Study & BINUS Network Design *| Algorithms & Computer Networks*

- Implemented computational sequence alignment algorithms for genomic data analysis.
- Designed enterprise campus network topology and IP routing infrastructure plans for BINUS University.

EDUCATION

BINUS University **Aug 2024 – Present**
Bachelor of Science in Computer Science | Tangerang, Indonesia

SMA Sutomo 1 **2022 – 2024**
Senior High School Diploma | Medan, Indonesia

ORGANIZATION EXPERIENCE

BNCC (Bina Nusantara Computer Club) **2024 – 2025**
Member

- Participated in programming workshops in C language and technical learning sessions, developing structured problem-solving and algorithmic skills.

Japanese Club (SMA Sutomo 1 Medan) **2023 – 2024**
Member

- Engaged in language study and cross-cultural learning activities, strengthening communication and teamwork skills.
