ABOUT ME

Computer Science student at Binus University with experience in Data Engineering, Data analyst project, SQL queries and Data visualization. Specializing in turning raw data into actionable insights. Highly motivated and ready to work to develop data processing skills and data analytics skill in internship opportunity.

HARD SKILLS & SOFT SKILLS

Programming Languages:	Python, SQL, C
Data Engineering & ETL:	Pentaho Data Integration (Spoon), MySQL
Analytics & Visualization:	Tableau, Power BI, Pandas, Scikit-learn
Statistical Analysis:	ANOVA, Chi-Square Test of Independence, Hypothesis Testing
Soft Skills & Tools:	Teamwork, Critical Thinking, Time Management, Leadership, Attention to Detail
Languages:	Indonesian, English

PROJECTS

E-Commerce Sales and Profit Analytics Using Data Engineering Pipeline *| Pentaho Data Integration, Power BI*

- Built an end-to-end ETL pipeline to extract, transform, and load raw e-commerce transaction logs into a star-schema dimensional model for analytics.
- Identified key factors influencing unit sales, net profit margins, and fulfillment bottlenecks across product categories and geographic regions.
- Visualization using power bi to know the information of the sales and profit

Database System Design & 3NF Normalization for a Digital Payment Platform *| MySQL*

- Modeled and normalized an un-structured (UNF) digital payment dataset into Third Normal Form (3NF) to eliminate insertion, update, and deletion anomalies.
- Designed a relational schema architecture covering Users, Account, Transaction, Payment Method, Payment, and Transaction History.
- Optimized database integrity and query execution for high-volume transactions including Top-Up, Peer-to-Peer Transfer, QRIS, and PayLater services.

Data Analytics in HR Datasets *| Python, Pandas, Scikit-learn, Data Visualization*

- Analyzed employee historical data to isolate key demographic, salary, and operational factors contributing to workforce terminations.
- Evaluated employee retention patterns and identified critical tenure drop-off milestones across organizational cohorts.
- Executed Chi-Square Tests of Independence and ANOVA to mathematically prove relationships between job roles, commute distance, and turnover risk.

Data Visualization in Video Games Sales *| Tableau*

- Developed interactive dashboards visualizing global video game sales across platforms, genres, and regional distribution channels.
- Modeled post-launch sales lifecycle decay, wishlist conversion rates, and player purchasing behavior across physical vs. digital storefronts.
- Executed statistical analysis to measure correlations between review scores, pricing models, and long-tail game revenue.

Movie Recommendation System using Aspect Based Extraction *| Python, Pandas, NLP, NLTK, Scikit-learn*

- Labeling dataset for aspect-based sentiment analysis.
- Train the dataset and extracting the aspect to evaluate user preferences.
- Checking the accuracy of the recommendation model.

Face Mask Detector *| Python, Computer Vision*

- Developed a real-time computer vision classification model for automated face mask detection from camera feeds.

Peer2Peer *| Software Development*

- Developed a platform for students to find friend to study with and make a platform that connects mentor and mentee.

Shippdeck *| Web Application*

- Created a web application for shipping sales that displays product images and prices.

Pbattle V Monster | *Java, Object-Oriented Programming*

- Programmed a turn-based RPG battle engine applying OOP principles (Inheritance, Encapsulation) for combat logic.

Global Alignment Study | *Computational Biology & Algorithms*

- Implemented computational sequence alignment algorithms for genomic data analysis.

BINUS Networking Design | *Cisco Packet Tracer*

- Designed enterprise campus network topology and IP routing infrastructure plans for BINUS University.

We Go Gym | *Figma*

- Making a prototype using figma.

EDUCATION

BINUS University **Aug 2024 – Present**
Bachelor of Science in Computer Science | Tangerang, Indonesia | GPA: 3.41 (up to sem 4)

SMA Sutomo 1 **2022 – 2024**
Senior High School Diploma | Medan, Indonesia

ORGANIZATION EXPERIENCE

BNCC (Bina Nusantara Computer Club) **2024 – 2025**
Member

- Participated in programming workshops in C language and technical learning sessions, developing structured problem-solving and algorithmic skills.

Japanese Club (SMA Sutomo 1 Medan) **2023 – 2024**
Member

- Engaged in language study and cross-cultural learning activities, strengthening communication and teamwork skills.

VOLUNTEERING

The Ethics of Communication | *SMA Buddhi Dharma*

- Engaged as a volunteer conducting educational activities on ethical communication principles for high school students.

Identifying Religion Teacher Strategies in Teaching Tolerance | *SMK Bina Informatika*

- Engaged in community outreach analyzing and supporting strategies for teaching religious tolerance and inclusivity.

Tree Planting & Biosphere Conservation | *Bandung*

- Participated in environmental conservation activities focused on tree planting and ecosystem restoration.

Beverage Bottle Recycling & Waste Management | *Community Outreach*

- Managed and sorted beverage bottle waste to facilitate recycling into functional products.

Educational Workshop on Youth Ambition & National Prosperity | *Orphanage*

- Taught children at an orphanage about the importance of personal ambition and career goals in driving national prosperity.
